Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3, 10-12, 24-26 and 38 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Ramm (US 2004/0087150).

Ramm discloses a structural element and a method for manufacturing structural elements. This system involves forming an inter-metallic connection in wire bonding which employs CuN in the manner claimed by the applicant. See paragraphs [0002]-[0044].

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1734

4. Claims 6-9, 13-23 and 27-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ramm as described above in paragraph 2 in view of Aoka et al (US 2002/0155702).

Aoka et al discloses forming a barrier layer of CuN on a copper interconnect by use of a nitrogen-containing plasma. See paragraph 61. It would have been obvious to one having ordinary skill in the art to employ a nitrogen-containing plasma, as taught by Aoka et al, in the system of Ramm in order to facilitate manufacture of the structural elements. In addition, without the disclosure of unexpected results, it is the examiner's position that the specific plasma and sputtering technique are well known and conventional in the art and would have been obvious to employ in the system of Ramm as a matter of design choice based upon desired physical properties of the articles being manufactured.

Allowable Subject Matter

5. The following is a statement of reasons for the indication of allowable subject matter: The prior art does not teach or fairly suggest the step of actively forming an oxide layer on the copper interconnect prior to formation of the CuN layer.

6. Claims 4-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Telephone/Fax

Art Unit: 1734

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James Sells whose telephone number is (571) 272-1237. The examiner can normally be reached on Monday-Friday between 9:30 AM and 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chris Fiorilla can be reached at (571) 272-1187. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.
